

EcoEngineers has developed a comprehensive approach to getting you and your compliance team ready for LCFS verification compliance and reporting. Our LCFS regulatory expertise combined with our experience in designing effective training and education programs make our team of experts the winning combination to get you LCFS Verification-ready.

**LCFS Monitoring Plan is recommended to be complete by the first quarter of 2020.
LCFS Verification site visits start in 2021, and the first report is due Aug. 31, 2021.**

Our readiness program will offer a half-day, on-site workshop where we will download all of the new LCFS Verification requirements — complete with checklist and workbooks, template for designing your LCFS Compliance Monitoring Plan, and ongoing consulting support through to plan completion. EcoEngineers also offers LCFS Verification Audit services.

Our LCFS Verification-ready services

- Discovery call prior to workshop to identify client specific need for knowledge
- On-site training and education workshop to fully inform compliance staff on program requirements.
A tailored curriculum will include at a minimum:

› LCFS 101

› LCFS Verification 101

› Market Dynamics

› GREET and
Carbon Intensity

- Provide Monitoring Plan templates compliant with LCFS Verification requirements
- On-going regulatory guidance on Monitoring Plan development
- Regulatory guidance on plan development per 95491.1
- Regulatory guidance on New Protocol Development, if needed
- Review and recommendations on Monitoring Plan program
