

EcoEngineers is a Renewable Energy consulting firm that holds deep expertise in audit, compliance management and consulting services under the Renewable Fuel Standard (RFS) Program and The California Low Carbon Fuel Standard (LCFS). We assist biofuel producers in navigating the complex landscape of federal and state regulations to connect them to markets and ensure the value of their energy credits.

EcoEngineers has partnered with several technology providers to support the seamless integration of the Kernel Fiber pathway to effectively measure the production of cellulosic Ethanol and generation of D3 RINs at your facility. Kernel Fiber Now™ connects you to our team of professionals who can help answer all of your questions and assist with many services.

Our services

- Third-party Engineering Review
- Quality Assurance Programs
- Technology Assessment
- RFS2 USEPA Registrations
- LCFS Pathway Modeling
- Environmental Impact Modeling & Analysis
- Life Cycle Analysis Modeling
- LCFS Verification
- Feasibility Studies
