

Protect the Value of Your Asset with a Trusted Partner

We understand the importance of protecting your clean energy assets with accurate, data-driven measurement and confirmation. The core principles that ensure the quality of EcoEngineers' audit program are:

- ✓ **RESPONSIBILITY**
- ✓ **DISCIPLINE**
- ✓ **INTEGRITY**
- ✓ **COMPETENCY**

EcoEngineers' Audit program is overseen by a licensed Certified Public Accountant, and every audit professional on staff adheres to exceptionally high standards to maintain our core principles and ensure your compliance.

Our commitment to you is demonstrated by our performance under these pillars: **integrity** as an auditor under the Renewable Fuel Standard (RFS) for 10 continuous years, **competency** with our accreditation as a Verification Body with 10 Lead Verifiers in the California Low Carbon Fuel Standard (LCFS) program, and **responsibility** and **discipline** displayed by our vast knowledge on new and evolving clean energy regulations.

Audit Services:

- RFS Quality Assurance Program (QAP)
- RFS Third-Party Engineering Reviews
- LCFS Validation/Verification
- Foreign Producer/Importer Monitoring
- ISCC Certification
- Voluntary Carbon Market Participation
- Custom Audit Protocol Development

Over 3.6 billion RINs verified in 2020.
