

# Eco Assure is here for you

Clean energy regulations are complicated, and the penalties are high for non-compliance. Monetizing the rewards of generating low carbon fuels requires meticulous attention to detail, expert regulatory knowledge, and effective communication with regulators.

We offer the option to outsource your compliance management activities to our Renewable Fuel Standard (RFS) and Low Carbon Fuel Standard (LCFS) subject matter experts.

'Eco Assure' is a comprehensive compliance support program that enables consistent data quality and compliance management across all clean energy regulations. With auditable methodologies in place, staff are trained, documentation is updated, and compliance risks are effectively managed. You choose the systems that suit your needs, and we go to work for you.

## The Eco Assure program includes:

- ✓ A process-driven auditable compliance management program inclusive of RFS, LCFS, and third-party voluntary low-carbon fuel production and credit monetization requirements
- ✓ Eco RFS compliance management
- ✓ Eco LCFS compliance management
- ✓ Facility registration guidance for clean energy programs like the RFS and LCFS
- ✓ Eco RIN Management Platform
- ✓ Help desk support with on-demand access to regulatory experts

More than 1 billion gallons of biofuel capacity enrolled in our compliance programs. **ROXBY HARTLEY, PH.D.**, Team Lead, [rhartley@ecoengineers.us](mailto:rhartley@ecoengineers.us), 831.383.9535
