

Stay ahead of RNG industry dynamics with our new curated report, the RNG Dispatch

Carbon markets for renewable natural gas (RNG) sector have been driven by regulations, and more recently, they're being guided by the desire to create new business opportunities through voluntary markets. As RNG leaders search for offtake partners beyond the regulated fuel markets, it's critical to understand the constantly changing industry, and federal and state regulations.

At EcoEngineers, we are the trusted advisors, carbon analysts, engineers, scientists, compliance auditors, regulatory consultants, and market researchers of the clean energy sector. We bring our extensive experience from regulated carbon markets and biofuels to facilitate projects across the entire energy transition — helping you make the most of your investment portfolio.

Our EcoUniversity team is passionate about educating our clients on their journey to clean energy. Through the EcoEngineers RNG Dispatch, we carefully collect the information that's of strategic importance for your business, synthesize it, and make it relevant to you, your organization, and your customers. On a monthly basis, you'll get roughly 15 pages of meaningful insights you need to navigate this changing market with zero time spent scanning for updates.

RNG Dispatch includes:

- Curated information on the ever-changing, multi-layered regulations that affect you – federal, state, international, regulated and voluntary markets, Renewable Portfolio Standards (RPS)
- Analysis of the evolution of these regulations, industry trends, and the cost of compliance
- Guidance on generating revenue from low-carbon projects and solutions, including insights on opportunities and risks
- Critical education as your team evolves, saving time for your team to focus on driving your business
- Market demand trend analysis and projections for RNG markets
- Future trend research within electrification and applicable impacts to the RNG industry

About EcoUniversity

Successful clean energy project owners require a solid grasp of the regulatory requirements that drive value to their projects. Our portfolio of training and education deliverables will empower you to make informed decisions on your behalf and maintain compliance in an ever-evolving regulatory landscape as we navigate the energy transition. EcoEngineers provides a myriad of workshops that can be taken individually or bundled together for a broader training program. Most workshops are 1 ½ - 2 hours in length and are designed to be interactive with time for open discussion of your specific goals and challenges. Our educational reports provide information on regulations affecting low-carbon fuels and carbon abatement options accessible to customers.

About EcoEngineers

EcoEngineers helps organizations create sustainable solutions for a better tomorrow. Our talented team of engineers, scientists, auditors, consultants, researchers, and analysts live and work at the intersection of low-carbon fuel policy, innovative technologies, and the carbon marketplace. Our people are trusted guides who help navigate the ever-changing energy landscape, providing the right tools, guidance, and knowledge to reduce your carbon footprint, and to assess the potential risk to your business from the uncertainties caused by a changing climate and low-carbon policies. Through our systematic approach, we deliver value and proven expertise through the entire clean energy continuum, including education, regulatory engagement, life-cycle analysis, asset development, compliance management, audit, and verification.
