

EcoUniversity — Answering Your Most Complex Carbon Questions

The transition to a clean energy future requires a solid grasp of global policies, technologies, and carbon markets. Our comprehensive training workshops, which include market outlooks and executive modules, help you effectively evaluate the impacts of climate-related risks on your business and maintain control over your environmental, social, and governance (ESG) goals.

Understanding global policies, technologies, and carbon markets is critical to taking control of your environmental, social, and governance (ESG) goals. EcoUniversity provides comprehensive training workshops, market outlooks, and educational webinars that can be taken individually or bundled together to create a bespoke training program for your entire organization.

Training Workshops

EcoUniversity's workshops are immersive and interactive, and led by our industry experts, both in-person and virtually. Our training modules can be tailored to meet the needs of your team, with focused discussion of your specific goals and challenges spanning low-carbon and zero-emission fuels, emerging mitigation and carbon removal technologies, policies and best practices for robust carbon markets, and carbon literacy.

Market Outlooks

Our team has worked in the regulatory landscape for decades, analyzing data from two of the most influential low carbon fuels programs in the United States – the U.S. federal Renewable Fuel Standard (RFS) and the California Low Carbon Fuel Standard (LCFS). Our two annual outlooks and periodic updates give your business an advantage regarding regulatory changes occurring in your markets.

Sample Workshops:

- Low-Carbon Fuel Regulations
- Low-Carbon Fuel Markets
- Compliance Training
- Life-Cycle Analysis with GREET
- Fuel Market Project Development
- Carbon Literacy Training
- Custom Program Development

Educational Webinars

EcoUniversity's webinars are attended by hundreds of industry experts and clean energy workers each month. We cover a wide range of topics, including carbon literacy, next frontiers for a renewable fuel, deep dives into new regulations, and more.

About EcoEngineers

EcoEngineers is a consulting, audit, and advisory firm with an exclusive focus on the energy transition. From innovation to impact, we help you navigate the disruption caused by carbon emissions and climate change.

We help you stay informed, measure emissions, make investment decisions, maintain compliance, and manage data through the lens of carbon accounting. Our team of engineers, scientists, auditors, consultants, and researchers live and work at the intersection of low-carbon fuel policy, innovative technologies, and the carbon marketplace.

Eco was established in 2009 to steer low-carbon fuel producers through the complexities of emerging energy regulations in the United States. Today, our global team is shaping the response to climate change by advising businesses across the energy transition.

Together, we can create a world where clean energy fuels a healthy planet.

Navigating the Energy Transition

- Asset Development
- Life-Cycle Analysis
- Compliance
- Regulatory Engagement

- Validation & Verification
- Quality Assurance Programs
- Third-Party Engineering Reviews

- Interactive Workshops
- Market Outlooks
- Carbon Literacy
