

# Your Guide in the Transition to Low-Carbon Biofuel Leadership

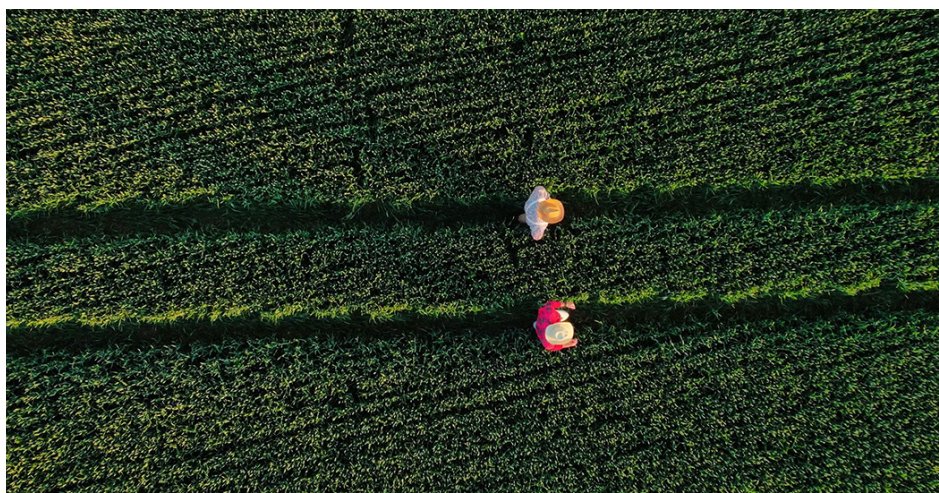

The biofuel industry is undergoing a quiet revolution. As new policies and carbon markets reshape the landscape, producers are propelled beyond traditional business operations. What was once optional is quickly becoming essential: reducing greenhouse gas (GHG) emissions through smarter, more strategic carbon management. The question now is not whether producers should adapt, but how they will do it.

EcoEngineers, recently acquired by leading global assurance partner LRQA, operates at the intersection of policy, carbon markets, and technology – where real transformation happens. As pioneers in the evolving low-carbon biofuel landscape, we equip producers with the insights and strategies needed to lead, compete, and thrive in this dynamic market. Our company is made up of proven industry experts,

engineers, scientists, auditors, and modelers all united by one mission – creating a positive impact in the world with our clients. We do not just provide technical guidance; we become an extension of our client's team in navigating complex carbon regulations, evaluating carbon-reduction technologies, understanding financial impacts, conducting life-cycle analysis (LCA), and ensuring compliance through American

## Our Services:

- Advisory and Consulting
- Education, Training, and Workshops
- Regulatory Engagement
- LCA Assessment and CI Modeling
- Program Registrations, Compliance, and Updates
- Audit and Third-Party Verification
- VCM Screening and Registry
- Renewable Identification Number (RIN) Program Management
- Feasibility and Market Studies
- Sustainability Management

National Standards Institute (ANSI) National Accreditation Board (ANAB) accreditation as a GHG verification body in accordance with International Organization for Standardization (ISO) standards ISO/IEC 17029:2019, ISO 14065:2020, and ISO 140643:2019. Together, we work toward a more sustainable future.

### Knowledge Is a Cornerstone of Success in the Low-Carbon Biofuel Economy

At EcoEngineers, we empower biofuel producers with the insights and strategies needed to navigate the complexities of carbon market regulations. Our team develops actionable project plans that enable participation in one or multiple carbon programs, helping producers unlock new revenue streams and diversify their business models.

Carbon markets are essential for long-term growth, and EcoEngineers provides end-to-end support through training and education, carbon intensity (CI) scoring, program registration, third-party verification, and more. We are recognized for our expertise across the following carbon market programs:

- United States (U.S.) Renewable Fuel Standard (RFS)
- U.S. 45Z Clean Fuel Production Tax Credit and others

- California Low Carbon Fuel Standard (CA-LCFS)
- Oregon Clean Fuels Program (CFP)
- Washington state Clean Fuel Standard (CFS)
- Canada Clean Fuel Regulations (CFR)
- Global voluntary carbon markets (VCM)
- Global RSB Certifications: Global Fuel, Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA) for SAF

producers, EU Renewable Energy Directive (RE) Fuel, Global Advanced Products

- Other global carbon programs

Let us help you succeed in today's carbon-driven marketplace.

### About EcoEngineers

EcoEngineers, an LRQA company, is a consulting, auditing, and advisory firm exclusively focused on the energy transition and decarbonization. From innovation to impact, Eco helps its clients navigate the disruption caused by carbon emissions and climate change. Its team of engineers, scientists, auditors, consultants, and researchers operates at the intersection of low-carbon fuel policy, innovative technologies, and the carbon marketplace.

For more information, visit [www.ecoengineers.us](http://www.ecoengineers.us).

### About LRQA

LRQA is the leading global risk management partner. Through its connected risk management solutions, LRQA helps clients navigate an evolving global landscape to keep organizations one step ahead. From quality assurance to safety, cybersecurity, climate performance and responsible sourcing, LRQA works with clients to identify risks across their businesses. LRQA team of experts then creates smart, scalable solutions, tailored to help organizations prepare, prevent, and protect against risk.
