

Regulatory Engagement: Support For Your Strategic Projects

Policy is a product of stakeholder input; therefore, it is important to have your voice heard. With the myriad of policies striving to reduce emissions, promote energy independence, and create jobs, keeping up with regulations across the globe is necessary to understand the risks and opportunities hidden in the emerging energy landscape.

Our Regulatory Engagement team has decades of experience researching, analyzing, and tracking key regulations while working closely with fuel and climate regulators worldwide. Our team stays current on key local, state, national, and international legislative, regulatory, and policy developments to help guide your regulatory strategy, advise you of emerging risks, and assist you in determining your business or project's viability under new and overlapping regulatory regimes. Having led more than 300 policy and advisory projects, our team is deeply immersed in industry stakeholder and policy advisory groups worldwide, specializing in the United States (U.S.), Canadian, and European markets.

EcoEngineers provides strategic consulting across the entire spectrum of global regulations, including the Renewable Fuel Standard (RFS), California Low Carbon Fuel Standard (CA-LCFS), Oregon Clean Fuels Program (OR-CFP), Canada Clean Fuel Regulations (CFR), British Columbia Low Carbon Fuel Standard (BC-LCFS), EU Renewable Energy Directive (RED) and its implementing measures, United Kingdom Renewable Transport Fuel Obligation (RTFO), Brazil RenovaBio, and emerging markets globally.

The carbon regulatory landscape is rapidly evolving, and actively engaging and understanding these regulations and policies is vital during the development of a new project, through execution and beyond. When investment is high and the regulatory landscape is volatile, a successful strategic approach can help ensure long-term success.

EcoEngineers can serve as your regulatory advisor and strategist throughout your project journey. Our experts provide in-depth analyses, strategic advice, and support engagement with regulatory, financial, and industry stakeholders.

Our Services:

- Regulatory Research and Analysis
- Strategy Development and Execution
- Advocacy
- Engagement with Stakeholders
- Regulatory Applications and Registrations

Our Regulatory Engagement team can help you facilitate important go/no-go investment decisions with our three-step process of analysis, strategy, and engagement.

Step 1 Analysis	Step 2 Strategy	Step 3 Engagement
• Understand project goals • Assess project risks • Perform regulatory research	• Develop technical positioning • Address risks and roadblocks • Craft a regulatory strategy • Establish clear milestones to achieving success	• Meet with regulators and key stakeholders • Develop regulatory submissions • Support throughout the full regulatory processes

Navigating the Energy Transition

About EcoEngineers

EcoEngineers, an LRQA company, is a consulting, auditing, and advisory firm with an exclusive focus on the energy transition and decarbonization. From innovation to impact, we help you navigate the disruption caused by carbon emissions and climate change. Our team of engineers, scientists, auditors, consultants, and researchers live and work at the intersection of low-carbon fuel policy, innovative technologies, and the carbon marketplace.
