

Creating Credible and Creditable Value

Projects in the VCM succeed on clear science, credible data, and the ability to withstand third-party review. EcoEngineers, an LRQA company, supports clients from early feasibility through verification and market engagement. **We help deliver carbon outcomes that buyers, investors, and regulators can trust.**

Carbon Project Evaluation

EcoEngineers performs independent assessments of feasibility, additionality, permanence risk, and market viability to support early investment decisions and reduce execution and audit risk.

Methodology Development

We have direct involvement in drafting and advancing methodologies with standards bodies, registries, and technology developers.

Project Development, Monitoring, and Reporting

Our team supports across project design, documentation, emissions quantification, monitoring, reporting, and verification system design, and verification readiness. We follow accounting approaches aligned with International Organization for Standardization (ISO) standards.

Auditing and Assurance

Eco is accredited by the ANSI National Accreditation Board

Our Experience:

- Bio-oil sequestration
- Bioenergy with carbon capture and storage (BECCS)
- Microbial carbon mineralization
- Marine carbon dioxide removal (mCDR)
- Enhanced rock weathering
- Deep-sea biomass sequestration
- Geologic biomass storage
- Biochar
- Biological methane abatement

(ANAB) as a greenhouse gas verification body in accordance with ISO standards ISO/IEC 17029:2019, ISO 14065:2020, and ISO 14064-3:2019. We are recognized leaders in

carbon dioxide removal (CDR) auditing, conducting project-level verifications of emission reductions and removals.

Regenerative Agriculture and Nature-Based Systems

We offer support for regenerative agriculture and forest-based projects. We help establish metrics, data systems, and clear documentation to support credible claims.

Social Programs and Responsible Sourcing

Our services are complemented through LRQA by social auditing and responsible sourcing capabilities. We offer advisory support for internationally recognized social standards and support worker voice, grievance mechanisms, and supply chain risk intelligence.

Life-Cycle Analysis (LCA)

Eco has conducted more than 1,000 LCAs since 2015, supporting project development, Scope 1, 2, and 3 accounting, environmental product declarations, and investment diligence.

EcoEngineers, an LRQA company, is a consulting, auditing, and advisory firm focused exclusively on decarbonization and the energy transition. Email us at clientservices@ecoengineers.us.
